Summary

Computer Science Engineering fresher with academic and project experience in **Full Stack Java Development, AI/ML, and Python programming.** Proficient in developing web applications, implementing machine learning models, and database management. Eager to contribute to software development projects and grow as a technology professional.

Education

Bachelor Of Engineering   2022 - 2026

Visvesvaraya Technological University   CGPA 8.0

Skills

Java │ DSA │Python │ HTML │ CSS │ JavaScript │ React.js │ Node.js │ Spring Boot │
MySQL │ NoSQL │ MongoDB │ Machine Learning

Work Experience

Web Developer Intern   April 2025 - May 2025

Cognifyz Technologies

- Assisted in developing and maintaining responsive web applications using HTML, CSS, JavaScript, and React.js.
- Gained hands-on experience in front-end design, debugging, and integrating APIs.

Projects

Airline Reservation and Database Management System

Developed an Airline Reservation and Database Management System using PHP, MySQL, HTML, CSS, and JavaScript. The application enables users to book and manage airline tickets efficiently while maintaining secure login authentication.

Human Face Recognition and Detection Application

Developed a Human Face Detection System using Python and OpenCV to accurately detect and localize human faces in real-time images and videos. The system leverages computer vision techniques to identify facial features and differentiate human faces from other objects.

Certification

Web Developer Intern
